Selected Past Performance

Project Management Engagements

New York Power Authority (NYPA): PMO & Portfolio Management assessment and corrective action implementation. Facilitated discovery sessions around project intake process workflows and plan to move to future state. Implementation of UMT360 Portfolio Management application.

Sevita: Provided Project Management consultants to oversee rollout of electronic medical records (PointClickCare (PCC) & NetHealth) across 295 sites in 21 states.

Device Deployment & Refresh of Old Equipment

Beth Israel Lahey Hospital: End user migration from various sites to a single administrative central office in downtown Boston. Move included device refresh project deploying 2,000 laptops to users, multi-function printer delivery and setup, network drop deployment and workstation setup.

New York State Senate: Deployed multi-function printers across State Senator's offices across the NYC region.

Network Infrastructure & Low Voltage Cabling

Keurig Dr. Pepper: Network drop deployment for security cameras and workstations in Houston, TX bottling plant.

Amazon: Ran all low voltage cables and installed device hardware at Texas facility for vape detectors, broken glass detectors, alarm panels, smoke detectors, cameras, and electrified door hardware

Lockaway Storage: Installation of gate hardware and smart latches, reducing the need for physical keys. Gates and storage doors are now opened using blue tooth technology from smartphones.

Application Development

Empire State Development (ESD): Developed a new database and a web application to manage high integrity data for economic incentive projects. The site and front end allowed the state agency to provide transparency for the public domain.
